

Solenoid Valve accessories SYSE Series

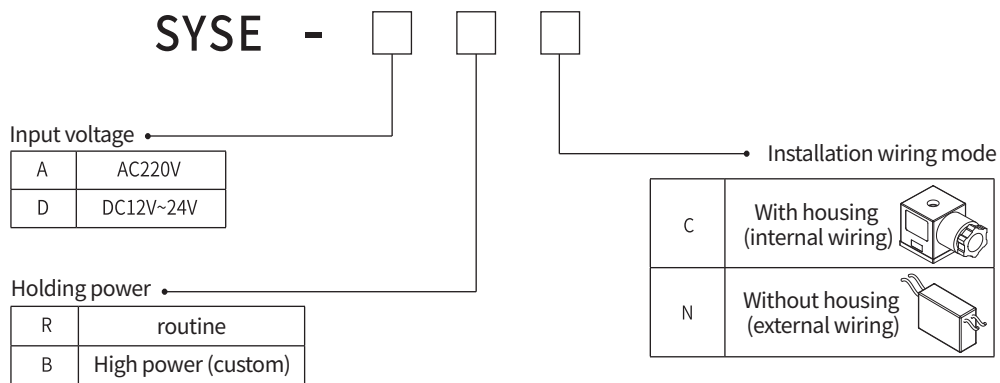

Product Features

- Power for a long time without heat, stable operation performance
- The power consumption is extremely low, only 20% of the original rated power
- Large starting magnetic force without leakage noise
- 2 wiring methods are optional, simple and convenient

SYSE series energy saving module is an efficient and energy saving product. The module uses IC integrated module to start, so that the product coil always maintains ultra-low power consumption after power, to ensure that the coil does not heat or burn.

Model Number

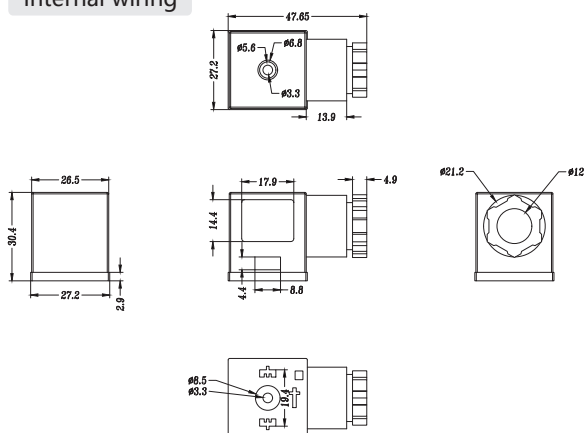

Parameter specification

Input voltage	AC 220V	DC12~24V
Applicable power	$\leq 70W$	
(after saving energy) Maintain power	3-6W	(P/10)W

Product size (mm)

Internal wiring

External connection mode
